

April Collections Slightly above Estimate; Lingering Concerns Remain for Achieving Governor's Budget Projection

General Fund revenue collections for the month ended April 2013 totaled \$3.59 billion, which was \$31.7 million, or 0.9%, above estimate. Fiscal year-to-date collections total \$23.9 billion, which is \$67.2 million, or 0.3%, above estimate. Total FY 2012-13 General Fund revenues are \$931.6 million, or 4.0%, higher than last year. April is the annual payment month for several corporation taxes and personal income tax. It is also a quarterly estimated tax payment month for personal income taxes.

Governor Corbett's FY 2013-14 Budget projects that the FY 2012-13 revenue surplus will be \$232 million by year's end, and so the year-to-date surplus of \$67.2 million with only two months remaining in the fiscal year will require robust revenue collections in May and June to grow by an additional \$165 million. April's revenue collections were buoyed by strong PIT annual payments and the unanticipated receipt of approximately \$25 million resulting from a settlement with DCNR. Neither of these items will recur in May or June, and so it is not readily apparent how revenue collections will achieve the projected \$232 million surplus.

Personal income tax (PIT) collections were above estimate by \$86 million, or 4.7%, for the month. Employers' withholding was below estimate for the month by \$13.1 million, and employers' withholding tax collections are running \$32.8 million short of estimate for the year-to-date. Employers' withholding tax collections

are 2.7% ahead of last year at this time. Considering that inflation is averaging about 1.7% through the first 10 months of the fiscal year, real wage income is growing by a relatively weak 1% for the year.

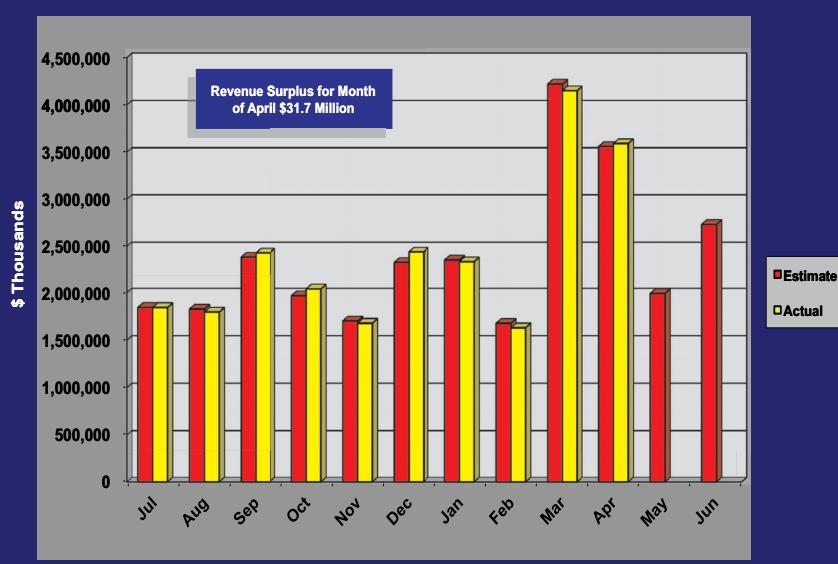

PIT annual tax payments received from 2012 tax returns in April 2013 were above estimate by \$109 million, or 12.4%. In addition, April 2013 annual tax payments were 27.1% greater than April 2012 annual tax payments. There is speculation that increased individual and capital gains tax rates at the federal level for 2013 might have caused taxpayers to accelerate income into 2012 in order to avoid

higher federal taxes, and thereby boosting PIT annual payments. Quarterly estimated PIT payments were \$10 million, or 3.8% below estimate. Quarterly estimated PIT payments are due again in June, and so based upon April's collections, there is no reason to assume that June's quarterly PIT payments will be stellar.

Corporation taxes missed the estimate for the month by \$11.8 million. Despite April's shortfall, corporation tax revenues are \$243 million above estimate for the year,

General Fund Tax Collections Fiscal Year 2012-2013 Comparison of Official Estimate with Actual Revenue by Month

Senate Appropriations Committee, Jake Corman, Chairman

led by strong corporate net income (CNI) and financial institutions tax collections. Unfortunately, the strength in CNI tax collections that was evident earlier in the fiscal year appears to have waned in March and April, which may be a precursor of lackluster collections in June as well. The capital stock/franchise tax (CSFT) continues to be phased out, and so CSFT revenue collections are becoming less important overall.

Sales and use tax collections were below estimate by \$64.8 million, or 7.9%, for the month. General sales and use tax accounted for \$57.9 million of the monthly shortfall, while sales tax on motor vehicles was below estimate by \$6.9 million. Total sales and use tax col-

lections for April 2013 were actually 3.2% less than April 2012 collections. A combination of negative factors is preventing a recovery in consumer spending from taking hold. Consumers lost about 1% of their disposable income resulting from the end of the federal payroll tax cut. They are facing high debt burdens and low house prices, and modest employment growth, which in turn creates a lack of consumer confidence. Because SUT makes up more than 30% of all General Fund revenues, the continuing weakness month after month is having a sizeable drag on revenue performance. Sales and use tax collections are now \$309.2 million below estimate for the year.

Realty transfer tax collections

were \$2.9 million, or 11.1%, above estimate for the month. RTT is now \$20.3 million, or 8%, ahead of estimate for the year. Inheritance tax collections were \$15.4 million, or 21.7%, above estimate for the month, but they are still \$31.6 million below estimate for the year.

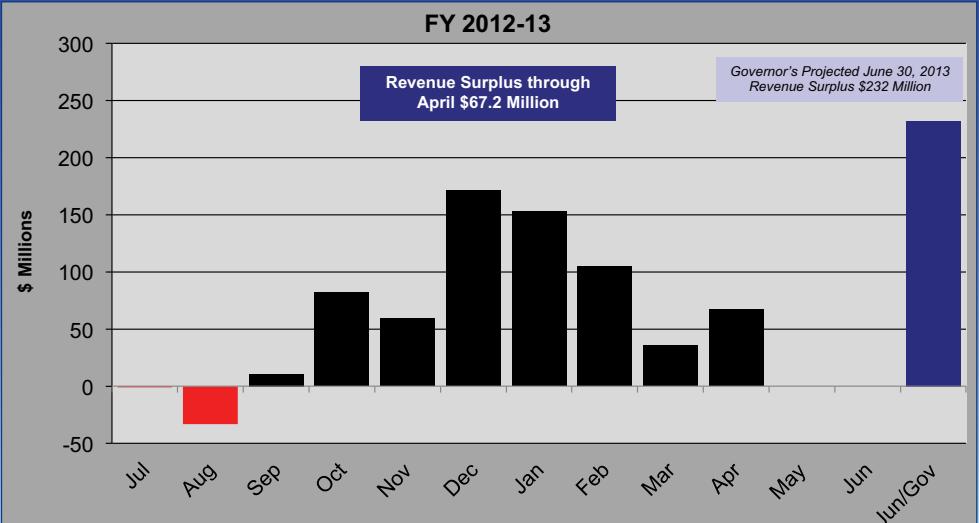

The cigarette tax was \$2.8 million below estimate for the month and is now \$40.5 million short of estimate for the year. Malt beverage, liquor and table games tax collections were all slightly below estimate for the month.

Motor License Fund collections were \$14.3 million above estimate for the month of April. The Motor License Fund is \$29 million above estimate for the year.
